## Gasconc2023 Natural Gas Industry High-end Seminar

August 16 (Wednesday) - August 18 (Friday)

Hangzhou, China

Hosted by:

### August 16, 2023

10: 00-17: 30 Conference sign-in

### August 17, 2023

9: 00-09: 10 Conference Opening Remarks

#### Topic 1: Opportunities and Challenges of Natural Gas Development in a Unified National Market

**09:10-09:40 Interpretation of the future development trend of China's natural gas industry under the policy guidance**

In-depth interpretation of industry policies

Future market development opportunities and directions under the unified large market of China

**09:40-10:10 Opportunities and Challenges in China's Natural Gas Market**

Analysis of the impact of the changing market environment on industrial development

Natural gas market trends in China in 2023 and the next 5 years

How companies can embrace opportunities and meet challenges today

10: 10-10: 30 Tea Break and Communication

#### Topic 2: Parallel resource assurance and cooperation, strengthening resource storage and transportation construction and infrastructure opening

**10:30-11:00 Multi-channel guarantee of resource supply capacity to boost the steady development of the natural gas industry in China**

Major resource suppliers increase storage and production to improve domestic gas supply self-supply rate

Multi-channel stabilization of natural gas imports to protect the development of the domestic market

Active development of unconventional gas market helps to ensure supply of domestic resources

Strengthen industry cooperation to build a healthy and growing natural gas market in China

**11: 00-11: 30 Open Infrastructure: The Innovative Service Model of PipeChina Operation**

Pipeline interconnection actively promoted, market activity significantly increased  
Fair opening of natural gas storage facilities and enterprise participation in on and off-site storage facility capacity leasing  
Exploring the profitability model of commercial operation and trading of LNG gas storage facilities

**11: 30-12: 00 Development Prospects of Pipeline Gas Trade in the Context of Market-based Reform**

Pipeline Gas Trading Market Introduction 2022-2023  
Practical sharing of pipeline gas trading model  
The significance of pipeline gas trade to the development of the industry and the outlook

**12: 00-14: 00 Lunch Buffet**

---

**Topic 3: Cooperation, innovation and win-win; international resource suppliers looking inward, domestic enterprise users looking outward**

---

**14:00-14:30 How Chinese buyers should respond in the face of the complex and volatile international LNG market**

International Market Review and Outlook  
Global LNG Trade Analysis  
Increased competition in the domestic natural gas market  
Rational allocation of import contract resources according to characteristics of enterprises

**14:30-15:00 How to optimize the cooperation model between international LNG resource suppliers and domestic buyers**

Current status of the operating model of LNG importers in China  
Operational Practices of Chinese LNG Receiving Stations Opened to Third Parties  
Optimization of cooperation model between international LNG resource suppliers and domestic buyers

**15:00-15:30 Exploring how to effectively achieve synergistic optimization of LNG trade**

Increased uncertainty in the external environment from a macro perspective  
Promote innovation in LNG trade models and contract terms  
Collaborate with downstream users to establish joint supply and market response mechanisms

**15: 30-16: 00 Tea Break and Communication****16:00-16:30 Flexible development and group cooperation of second- and third-tier enterprises of imported LNG**

The external environment for the survival of the second- and third-tier enterprises of imported LNG  
How to build a diversified and flexible operation model using its own advantages of an enterprise  
Enterprise group cooperation in the market-oriented environment to maximize the benefits of industry

**16:30-17:00 Opening up LNG industry integration and revitalizing market flexibility**

China's LNG Market Status and Outlook

How companies should respond to risks arising from changes in external markets

Industry integration model sharing to maximize integrated value

**18: 00-20: 00 Welcome Dinner****August 18, 2023****9: 00-09: 10 Welcome and Introduction****Topic 4: Financial Derivatives Market****9:10-9:40 Interpretation of Natural Gas Price Market Reform**

Direction and objectives of natural gas market-oriented reform

Approval and price reform of gas for people's livelihood

The establishment of natural gas price linkage mechanism and difficult breakthroughs

**09:40-10:10 China's natural gas market pricing and development trends**

Pipeline Gas Contract Pricing Model

Medium and Long Term Agreement Gas Contract Pricing Model

Out-of-contract volume pipeline gas prices and secondary trading

**10: 10-10: 30 Tea Break and Communication****10:30-11:00 Introduction to China's LNG futures products and discussion of derivatives**

Introduction to China's LNG Futures Products and Practices

Impact of LNG futures products on the natural gas market

Exploring the direction of LNG futures and other financial derivatives in China

**11:00-11:30 The significance of domestic listing of LNG futures for entities**

China's LNG futures market trading logic

The significance of domestic listing of China's LNG futures for entities

How Entities Can Participate in LNG Futures

**11:30-12:00 Introduction to diversification of natural gas trading varieties in the Exchange**

The development history and future trends of the trading center  
 Introduction to the existing natural gas-related trading products in the Exchange  
 Trading product outlook and value to the market

**12: 00-14: 00 Lunch Buffet**

**Note: The above conference agenda is a preliminary design plan, and will continue to be adjusted and improved in the future. Stay tuned.**

### Conference Background

Along with the further deepening of China's market-oriented reform, China will build a unified natural gas market, with both opportunities and challenges in the development process. LNG futures are about to go online, which will provide more opportunities and hedging tools for LNG companies.

Companies involved in the natural gas market should prepare in advance in multiple ways, seize the reform dividend and derivatives opportunities, avoid risks, strengthen diversified cooperation, and do a good job in adjusting corporate strategies and landing strategies to meet the complex and changing new market and environment.

## About CEthinktank & Gas Tank

CEthinktank, along with its brands Gas Tank and Gasconc, is a professional information, analysis, consulting, big data, and conference training service provider in the vertical fields of natural gas and new energy in China. We are committed to providing high-quality business decision-making service systems for enterprises and public institutions, and serving as the think tank for enterprise management and operations.

**CEthinktank** has been rooted in the Chinese natural gas market for more than 18 years, with a team of data collection experts and a precise methodology for analyzing and predicting industry and market changes from a professional business perspective. We are able to timely grasp market changes, and conduct short, medium, and long-term price, supply and demand trends, strategy forecasts, economic analysis, and strategic planning. For more information about CEthinktank, please visit <http://www.cethinktank.com/>.

**Gas Tank** provides clients with natural gas price and supply and demand data, market research, policy studies, industry research reports and online tools to help them make accurate decisions and improve economic efficiency and operational effectiveness. Gas Tank boasts first-hand basic data collectors, analysts and consultants, and regularly conducts interviews and research on government officials and business people in upstream, midstream, and downstream companies. For more information about Gas Tank, please visit <http://www.gastank-china.com/>.
